Association for Emancipation, Solidarity and Equality of Women

## ABOUT ESE

Association ESE is a civil society organization that works on improving exercise of social and economic rights by vulnerable groups of citizens, by means of their empowerment, mobilization and engagement in creation, implementation and evaluation of public policies and services in the Republic of Macedonia.

ESE's driving force is its commitment to resolution of problems. By promoting and improving the human rights, we improve social and economic justice, having in mind that human rights are an invaluable collection of standards that should be enjoyed by all. We are particularly devoted to work in the field of promotion and improvement of health rights and women rights. Therefore, we are focused on two goals, those being: to address urgent needs of citizens, in particular the needs of vulnerable groups of citizens, and to influence creation of sustainable and long-term changes. We do much more than documenting, reporting and publicly condemning injustices in the society. We provide legal and paralegal assistance, allowing citizens to exercise their rights and change their living conditions. Moreover, we advocate for changes of legislation and policies that affect exercise of health rights and women rights. We advocate at national and at international level. We draft and submit "shadow reports" and other types of documents to competent international bodies concerning the degree of implementation of international treaties on human rights.

# 1.1.

## **STRENGTHENING AND PROMOTING ENGAGEMENT OF CITIZENS IN THE PROCESSES ON PLANNING, IMPLEMENTATION AND EVALUATION OF LEGAL REGULATIONS, BUDGETS AND SERVICES, AS PART OF THE SOCIAL ACCOUNTABILITY AND LEGAL EMPOWERMENT APPROACH**

In 2021, we will continue to work with the three Roma civil society organizations (IRIS, KHAM and Romano Chachipe), who with our help implement the integrated approach (social accountability and legal empowerment) in the field of promotion of the health of Roma in the four municipalities where they work.

The strengthening of their capacities, for them to work on inclusion of the Roma population in the processes of planning, implementation, and evaluation of certain health rights, will be carried out through training, consultations and mentorship in relation to: the work with the Roma community (community mapping and mobilization); processing and analyzing data on health status and access to health services; processing and analysis of data from the process of monitoring and analysis of budgets at the local level; providing paralegal assistance; preparation and implementation of local advocacy strategies; as well as continuous monitoring of their work. In 2020 we continue with the process of expansion of the scope of work on the issue of mental health of Roma. The expansion of the work on the mental health of Roma was initiated in 2020 through and initial training and planning process, and in 2021 we will continue to offer continuous support to the three Roma CSOs to successfully implement this work in Roma communities where they work.

Together with the strengthening of the capacities of the civil society organizations with which we cooperate continuously, in 2021, we will work on strengthening the capacities of civil society organizations from North Macedonia and the region of Southeast and Central Europe who are interested in implementing the methodologies for social accountability in their work. We will provide training for these methodologies for civil society organizations from Romania, Bulgaria, Greece, Hungary and Slovakia. We will also provide technical support and mentorship to three civil society organizations from Romania (Bucharest, Cluj and Fetesti) and one civil society organization from Bulgaria (Sliven) who use the social accountability methodologies to promote access to health for Roma. In Macedonia and the region, we will strengthen the capacities of civil society organizations working on harm reduction programs from Macedonia (HOPS), Serbia (Prevent), Montenegro (Juventas) and Bosnia and Herzegovina (Margina) by providing mentoring support for using the methodology for budget monitoring and advocacy. This type of assistance and support will be offered to all other organizations that are interested in using some of the social accountability approaches.

## 1.2.

### **CAPACITY BUILDING FOR PUBLIC INSTITUTIONS TO INVOLVE CITIZENS AND CSO'S IN DEVELOPMENT, IMPLEMENTATION AND MONITORING OF LEGAL REGULATIONS, BUDGETS AND SERVICES**

In order to introduce the practice of involving the citizens and CSOs by the public institutions, in 2021 we will continue our work on strengthening the capacities of the public institutions for involving the citizens and civil society organizations in the creation, implementation and monitoring of the legislation, budgets and services. During the calendar year, we will continue with our collaboration with the Ministry of Health on scaling up the number of representatives of the public health institutions that will be involved in the capacity building activities, as well as health programs that will be subject of public discussions. The capacity-building activities will be related toward the application of the methodologies for social accountability (community monitoring and social audit) in order to involve the citizens in the process of monitoring the health care programs. During the year we will work on improvement of the e-training curriculum developed in the previous year, as well as on developing a concrete plan and tools for implementation.

The capacity building activities will be realized in the first half of the year, while the methodologies will be implemented in the second half of the calendar year following the preparation stage in the budget process.

## 1.3.

### **IMPROVING THE HEALTH STATUS AND ACCESS TO HEALTH SERVICES FOR WOMEN, MOTHERS/PARENTS AND CHILDREN**

In terms of health promotion and access to preventive health services for women, mothers/parents and children, ESE will continue in 2021 to monitor and analyze the impact of global economic trends/decisions on national macroeconomic policy and their influence on the overall budget for the preventive health care for women's reproductive health and for the health of mothers/parents and children. The analysis conducted will be based on data that is publicly available information and through submission of requests for access to public information. In addition, ESE will conduct monitoring and analysis of the preventive Programs under the Ministry of Health, such as the Program for Early Detection of Malignant Diseases (Components for Screening of Cervical Cancer and Breast Cancer Screening), the Program for Active Health Protection of Mothers and Children, the Program for a copayment of health services related to pregnancy, delivery and infant care, regarding the realization of the activities and the budget of the Programs. At the same time, we will continue to monitor the health services delivery related to: gynecological health care on a primary level, patronage nurse services, services delivered in the departments for preventive health care for children (immunization and preventive check-ups of children) and other related health services. The monitoring findings will serve to identify the situation and draft recommendations

for improving the access of women, mothers/parents and children to these health services. Findings and recommendations will be presented in front of the relevant stakeholders and the general public and will be used for advocacy purposes.

Regarding the work related to monitoring the indicators of perinatal and infant mortality, in 2021 we will continue our advocacy work, based on the Action plan for improvement of the health of women, mothers and children prepared in 2020. In the first trimester of the year, our advocacy efforts will be based on the advocacy strategy developed in the second half of 2020. After the first trimester, we will update the existing advocacy strategy with a timeline until the end of 2021. The updating process will be based on the findings from the conducted continuous monitoring on the level of adopted and implemented measures and activities from the relevant institutions and monitoring of the trends of perinatal and infant mortality rates. All advocacy demands as well as the findings from the monitoring will be presented to the relevant stakeholders and the general public.

In 2021, within the ESE office, the Health Information Center will continue to work through which we will continue to provide free health information and advice for women and men in the following areas: reproductive health, sexual health, menopause, osteoporosis, etc. Through the center, we will provide free services including blood pressure measuring and conducting fast testing for blood glucose, cholesterol and triglycerides.

## 1.4.

### **IMPROVING THE HEALTH STATUS AND ACCESS TO HEALTH SERVICES FOR ROMA PEOPLE, INCLUDING BOTH WOMEN AND MEN**

In the field of health promotion and access to health services for the Roma population in 2021, ESE will continue to cooperate with the three partners Roma organizations. In this regard, we will assist them in the process of education and empowerment of the Roma community related to their health and social rights, through securing themes for the education of the community. We will provide technical assistance and mentorship to the partner Roma CSOs to implement Local level advocacy strategies for improvement of the health of Roma women, mothers and children, which were prepared at the end of 2020. Also, ESE will coordinate the joint advocacy efforts on the national level in this regard. By the end of 2021, we will prepare advocacy strategies for 2022.

In the second half of 2021, we will conduct the next cycle of data collection from the Roma households with the purpose to collect data related to the health status, access to health services, violation of health rights and similar issues. The previous cycle of data collection was in 2019, and ESE and partner Roma CSOs are collecting these data on a two-year cycle in order to detect changes, as well as to detect the current needs of Roma communities, upon which the advocacy strategies are developed.

In the activities aimed for analysis of the impact of global economic trends/decisions on national macroeconomic policy and their influence on the overall budget for the preventive health care for women's reproductive health and for the health of mothers/parents and children (described under section 1.3.), particular emphasis will be given on Roma population.

Consequently in the follow-up advocacy efforts, special emphasis will be given to improvement of the situation among Roma.

## 1.5.

### **IMPROVING ACCESS TO THE LABOR MARKET FOR WOMEN**

In 2021, ESE will continue to monitor the employment policies, including the annual operational plans for active employment measures and services, by collecting and analyzing data related to the program and budget planning and implementation of the policies and measures by the relevant public institutions in 2020. The findings for 2020 will be complemented with those determined for the period from 2014 to 2019. Based on the finding from the conducted monitoring, in 2021, ESE will develop and publish one advocacy document that will be promoted at one press conference followed by public debate.

## 1.6.

### **OFFERING SYSTEMIC SOLUTIONS TO UNPAID CARE WORK FOR ADULT PERSONS IN NEED OF CARE**

In 2021 we will prepare and conduct an advocacy strategy for improvement of the conditions for the people in need of care in their households, as well as for their caregivers and the entire family. The advocacy strategy will be based on the prepared recommendations for improvement of the situation of adult persons in need of care in their households in 2020, as well as on the nationwide research on this issue which ESE published in 2019. For the purpose of adequate preparation and implementation of advocacy strategy in 2021, we will continue with the process of desk research to identify the relevant policies from the health and social sphere which should be amended, which started in 2020. This process is important to continue having in consideration the frequent changes in laws and policies, and the adoption of many new policies in the course of the pandemic. The advocacy demands will be publicly promoted through a public event and media.

## 2.1.

### **STRENGTHENING CAPACITIES OF COST-EFFECTIVE ALTERNATIVES to HELP PEOPLE RESOLVE UNMET JUSTICE NEEDS**

Our strategic commitment is to facilitate access to justice for citizens by investing in economically viable alternative solutions to meet their legal needs, such as the provision of paralegal assistance and support in the community.

In 2021, we will continue to work on continuous strengthening of the capacities, that is, the knowledge and skills of the community paralegals who provide assistance and support to the vulnerable groups of citizens within different CSO's: IRIZ, Romano Chachipe, KHAM, HOPS, HERA and Helsinki Committee for Human Rights. For these purposes, we will test the developed e-training program and invite paralegals from different CSO's to join the training modules and strengthen their knowledge and skills.

## 2.2.

### **COLLECT PEOPLE - CENTERED JUSTICE DATA AND PROVIDE EVIDENCE TO FACILITATE ACCESS TO JUSTICE**

The provision of data from the perspective of citizens as end-users of justice, particularly vulnerable groups of citizens, that is, collecting evidence of their legal needs and the barriers they face is crucial for facilitating access to justice.

In 2021, we will continue to determine court cost on all court procedures relevant to the resolution of domestic violence, including child alimony requested and approved by the courts, through direct consultation of women who suffered domestic violence who are beneficiaries of ESE's Legal Aid Center (LAC). We will use the main findings from our research to undertake advocacy activities to facilitate access to justice for this especially vulnerable group of women. Moreover, we will prepare an access to justice index for women that suffered domestic violence, based on the previously developed methodology for measuring access to civil and criminal justice.

In 2021, we will continue to advocate for expanding the scope of data collected by relevant institutions involved in providing justice to citizens, and we will continue to support the implementation of the UN Sustainable Development Goal 16.3. Rule of law at the international and national level and ensuring equal access to justice for all.

All of our research and advocacy efforts related to access to justice will be strengthened in 2021 with the development and implementation of a plan for awareness-raising and media inclusion on people-centered justice data promotion.

## 2.3.

### **PROVIDE ACCESS TO PEOPLE-CENTERED JUSTICE SERVICES FOR WOMEN THAT SUFFERED DOMESTIC VIOLENCE**

The promotion and development of specialized services for access to justice for vulnerable groups of citizens, based on their justice needs, significantly contribute to addressing the specific legal problems they face in their access to justice. In 2021 we will focus on increasing access to justice services for women that suffered domestic violence, by undertaking especially designed to respond to their specific legal needs for resolution of domestic violence and other related legal problems identified under output 2.2. In this regard, we will continue to provide direct support for the women, while in parallel we will support the capacity building of institutions involved in the criminal justice system.

In 2021, we will continue to provide free legal aid to the app. 200 women annually, psychological counseling to 30 women, and court representation to 10 women that suffered domestic violence. Moreover, we will broaden the provision of legal advice, through the intense promotion of the virtual legal platform "Ask for Advice".

In parallel, we will enhance the capacities of the law enforcement officers as the main entry point in the criminal justice system for protection against domestic violence. We will focus on assessing and strengthening the police capacities for implementation of the main legal obligations related to domestic violence: the preventive role in applying the urgent temporary measure of protection; and effective investigation and evidence collection in domestic violence cases.

In 2021, we will develop a pioneer program for capacity building of young lawyers in monitoring, analyzing and solving the legal needs of women who suffered domestic violence. We will establish a pool of specialized young lawyers and engage them in the practical application of court monitoring and legal empowerment methodologies for enhancing access to justice for women that suffered domestic violence.

## 2.4.

### **ENHANCING ACCESS TO JUSTICE AND THE RULE OF LAW BY INVESTING IN THE FORMAL JUSTICE INSTITUTIONS THAT PLAY A FRONTLINE ROLE IN DELIVERING JUSTICE**

Strengthening the capacities of formal justice institutions that play a frontline role in delivering justice for citizens is necessary for the identification and resolving of citizens' unmet justice needs. Recognizing this need, in 2021, we will pilot the developed monitoring tools for assessing the situation with gender equality in the judiciary.

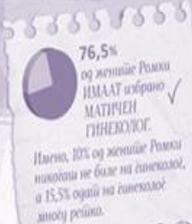

In 2021 we will continue to monitor the transparency, accountability, and effectiveness of the Commission for Protection against Discrimination (CPD), based on the previously prepared monitoring methodology for this purpose. At the same time, we will organize meetings with the members of the Commission and the general and expert public to promote the monitoring findings and recommendations for improving the work of this body.

# TO PROMOTE FISCAL TRANSPARENCY OF INSTITUTIONS IN THE FIELD OF SOCIAL AND ECONOMIC RIGHTS

ВО ПЕРИОД КОГА СЕ БЕЛЕЖИ ДРАСТИЧЕН ПОРАСТ НА ДОЕНЕЧКАТА СМРТНОСТ КАЈ РОМИТЕ, ВЛАДАТА НА РМ И МИНИСТЕРСТВОТО ЗА ЗДРАВСТВО ГИ КРАТАТ АКТИВНОСТИТЕ И СРЕДСТВАТА НАМЕНЕТИ ЗА УНАПРЕДУВАЊЕ НА ЗДРАВЈЕТО НА МАЈКИТЕ И ДЕЦАТА РОМИ

### 3.1.

#### **INCREASING PUBLIC AWARENESS ON THE IMPORTANCE OF FISCAL TRANSPARENCY AND THE NEED FOR PRIORITY-BASED BUDGETING**

In 2021, as in the past ten years, ESE will continue working on increasing public awareness of the importance of fiscal transparency and the need for the introduction of priority-driven budgeting in the public sector.

More precisely, in 2021 ESE will work on increasing the public awareness of the importance and the need for a high level of transparency and accountability in the fiscal operations in the public sector and access to quality fiscal data, by providing information and educational materials related to the fiscal transparency, fiscal performance in the public sector and the need for priority-driven budgeting and participation. This approach will enable continuity and upgrade of ESE's work in this area in the direction of improving the capacities of at least 150.000 citizens to understand and actively enjoy their rights to access public information, to understand the functioning of the public system in the Republic of North Macedonia, to understand and easily follow the information that the public system in the Republic of North Macedonia produces and actively act in the direction of holding their political representatives to account for their work. For this purpose, we will maintain and update the thematic website [www.fiskalnatransparentnost.org.mk](http://www.fiskalnatransparentnost.org.mk) by publishing at least 200 information/materials during the year such as laws and bylaws for the regulation of the fiscal transparency in the country and internationally; fiscal data sets on national level fiscal operations for further analysis and research, most recent publications in the area and most important news in the area domestically and worldwide.

We will continue to update and maintain the ongoing social media campaign under the name "Fiscal Transparency Macedonia" by developing and posting at least 300 information/materials for encouraging discussions; initiate public consultations; mobilize citizens to make pressure on the decision-makers for some current negative changes; inform citizens by providing educational videos and materials, as well as providing simplified information on the public institution operations.

To create more space for citizens to directly interact with decision-makers and experts on the most important topics for them, in 2021 ESE will develop and organize two online debates.

## 3.2.

### **ASSESSING AND ENHANCING THE LEVEL OF FISCAL TRANSPARENCY AND ACCOUNTABILITY OF PUBLIC INSTITUTIONS FOLLOWED BY ADVOCACY EFFORTS**

ESE, as in the past seven years, during 2021 will continue to monitor and evaluate the level of reactive transparency, i.e. will measure the level of compliance with the obligations arising from the Law on Free Access to Public Information by at least 60 public institutions in the Republic of North Macedonia (the Government of the Republic of North Macedonia, the Ministry of Finance, the Ministry of Health, the Ministry of Economy, Agency for Protection of the Right for Access to Public Information, Employment Agency, 32 primary health centers, 10 public health centers, Institute for Public Health and other public institutions). The level of reactive transparency will be assessed based on active use of the established mechanisms for access to public information (by submitting at least 800 requests for free access to public information and using the mechanisms for the protection of the right for free access to public information).

In 2021, in addition to the level of reactive transparency, we will also assess the level of pro-activity of 25 public institutions (Government of RNM, Ministry of Finance, Ministry of Health, Ministry of Labor and Social Policy, Ministry of Foreign Affairs, Ministry of Culture, The Ministry of Internal Affairs, the municipalities of Delchevo, Shuto Orizari, Vinica, and Pehcevo, the Public Health Centers Skopje and Kocani, the Primary Health Center Skopje, Employment Agency, etc.) in the sharing of 16 key budget and program documents (budget calendar, proposed and enacted, proposed and enacted amendments to the budget, proposed and adopted Year-End Report, an annual program for work, strategic plans, reports from an authorized state auditor, etc.) on their web pages.

Additionally, in 2021, we will continue with the ongoing annual monitoring of the public procurement procedures conducted by the public health institutions in order to identify the shortcomings in the public procurement system in the field of health and provide recommendations for improving the level of efficiency, transparency and accountability in these procedures in the public health sector. This is, maximizing the economy, efficiency, and effectiveness in conducting the public procurement procedures; maximizing the quality of the services provided by these institutions; maximizing the effects of using citizens' money for providing public health services and facilitating citizens' access to health care. Through the public procurement procedures assessment, during this year, 1.000 procedures conducted by 62 public health institutions implemented in 2020 will be monitored and evaluated. The active participation in the OGP process at the national and international level is a key strategic commitment of ESE, hence in 2021 ESE will continue to monitor and report on the public institutions achievements from this process by developing reports which will help the Independent Reporting Mechanism to develop better quality recommendations to the country, as

well as by proposing solutions to some problems in the area of fiscal transparency, access to information and access to public services and following their implementation. Additionally, based on the findings from the conducted assessments, during 2021, ESE will develop and promote five reports that will incorporate key findings and recommendations. The developed reports will be used as a base for further development of recommendations for improvement in the operation of at least 80 responsible public institutions.

## DETAILED PLAN OD ACTIVITIES

ВО ПЕРИОД КОГА СЕ БЕЛЕЖИ ДРАСТИЧЕН ПОРАСТ НА ДОЕНЕЧКАТА СМРТНОСТ КАЈ РОМИТЕ, ВЛАДАТА НА РМ И МИНИСТЕРСТВОТО ЗА ЗДРАВСТВО ГИ КРАТАТ АКТИВНОСТИТЕ И СРЕДСТВОТА НАМЕНЕТИ ЗА УНАПРЕДУВАЊЕ НА ЗДРАВЈЕТО НА МАЈКИТЕ И ДЕЦАТА РОМИ

ВЛАДАТА НА РМ И МИНИСТЕРСТВОТО ЗА ЗДРАВСТВО ГИ КРАТАТ АКТИВНОСТИТЕ И СРЕДСТВОТА НАМЕНЕТИ ЗА УНАПРЕДУВАЊЕ НА ЗДРАВЈЕТО НА МАЈКИТЕ И ДЕЦАТА РОМИ

Спидијата на доенечка смртност во РМ е двојно повисока споредено со земјите од Европската Унија и има осцилаторен карактер, додека во земјите на ЕУ во изминатите 15 години бележи континуирано намалување.

ЗА ШТО СЕ ПОТРОШЕНИ ВЕТЕНИТЕ, А НЕРАСПРЕДЕЛЕНИ 1,8 МИЛИОНИ ЕВРА ЗА ЛИЦАТА СО РЕТКИ БОЛЕСТИ?

од 100% ИЗНОС НА АКЦИЗА КОЈА СЕ НАПЛАКА ПО ПАРЧЕ ЦИГАРА

Половина од средствата од акцизите за пиво, за етил алкохол и за цигари, кои секоја година ги добива Министерството за здравство, наместо за обезбедување здравствена заштита се користат за лични и профитни на Министерството.

## **STRATEGIC PRIORITY 1:**

### **TO ENGAGE CITIZENS IN THE PROCESSES ON PLANNING, IMPLEMENTATION AND EVALUATION OF LEGAL REGULATIONS, BUDGETS AND SERVICES**

#### **OBJECTIVE 1: Strengthening and promoting engagement of citizens in the processes on planning, implementation and evaluation of legal regulations, budgets and services, as part of the social accountability and legal empowerment approach**

##### Outputs:

- Strengthened capacity of Roma CSOs and secured technical support for implementation of the integrated approach (social accountability and legal empowerment) aimed at improving the health status of Roma people
- Strengthened capacity of CSOs and secured technical support for the implementation of social accountability methodologies

#### **OBJECTIVE 2: Capacity building for public institutions to involve citizens and CSOs in development, implementation and monitoring of legal regulations, budgets and services**

##### Outputs:

- Strengthened capacity of the Ministry of Health and other public institutions for application of social accountability and legal empowerment methodologies

#### **OBJECTIVE 3: Improving the health status and access to health services for women, mothers/parents and children**

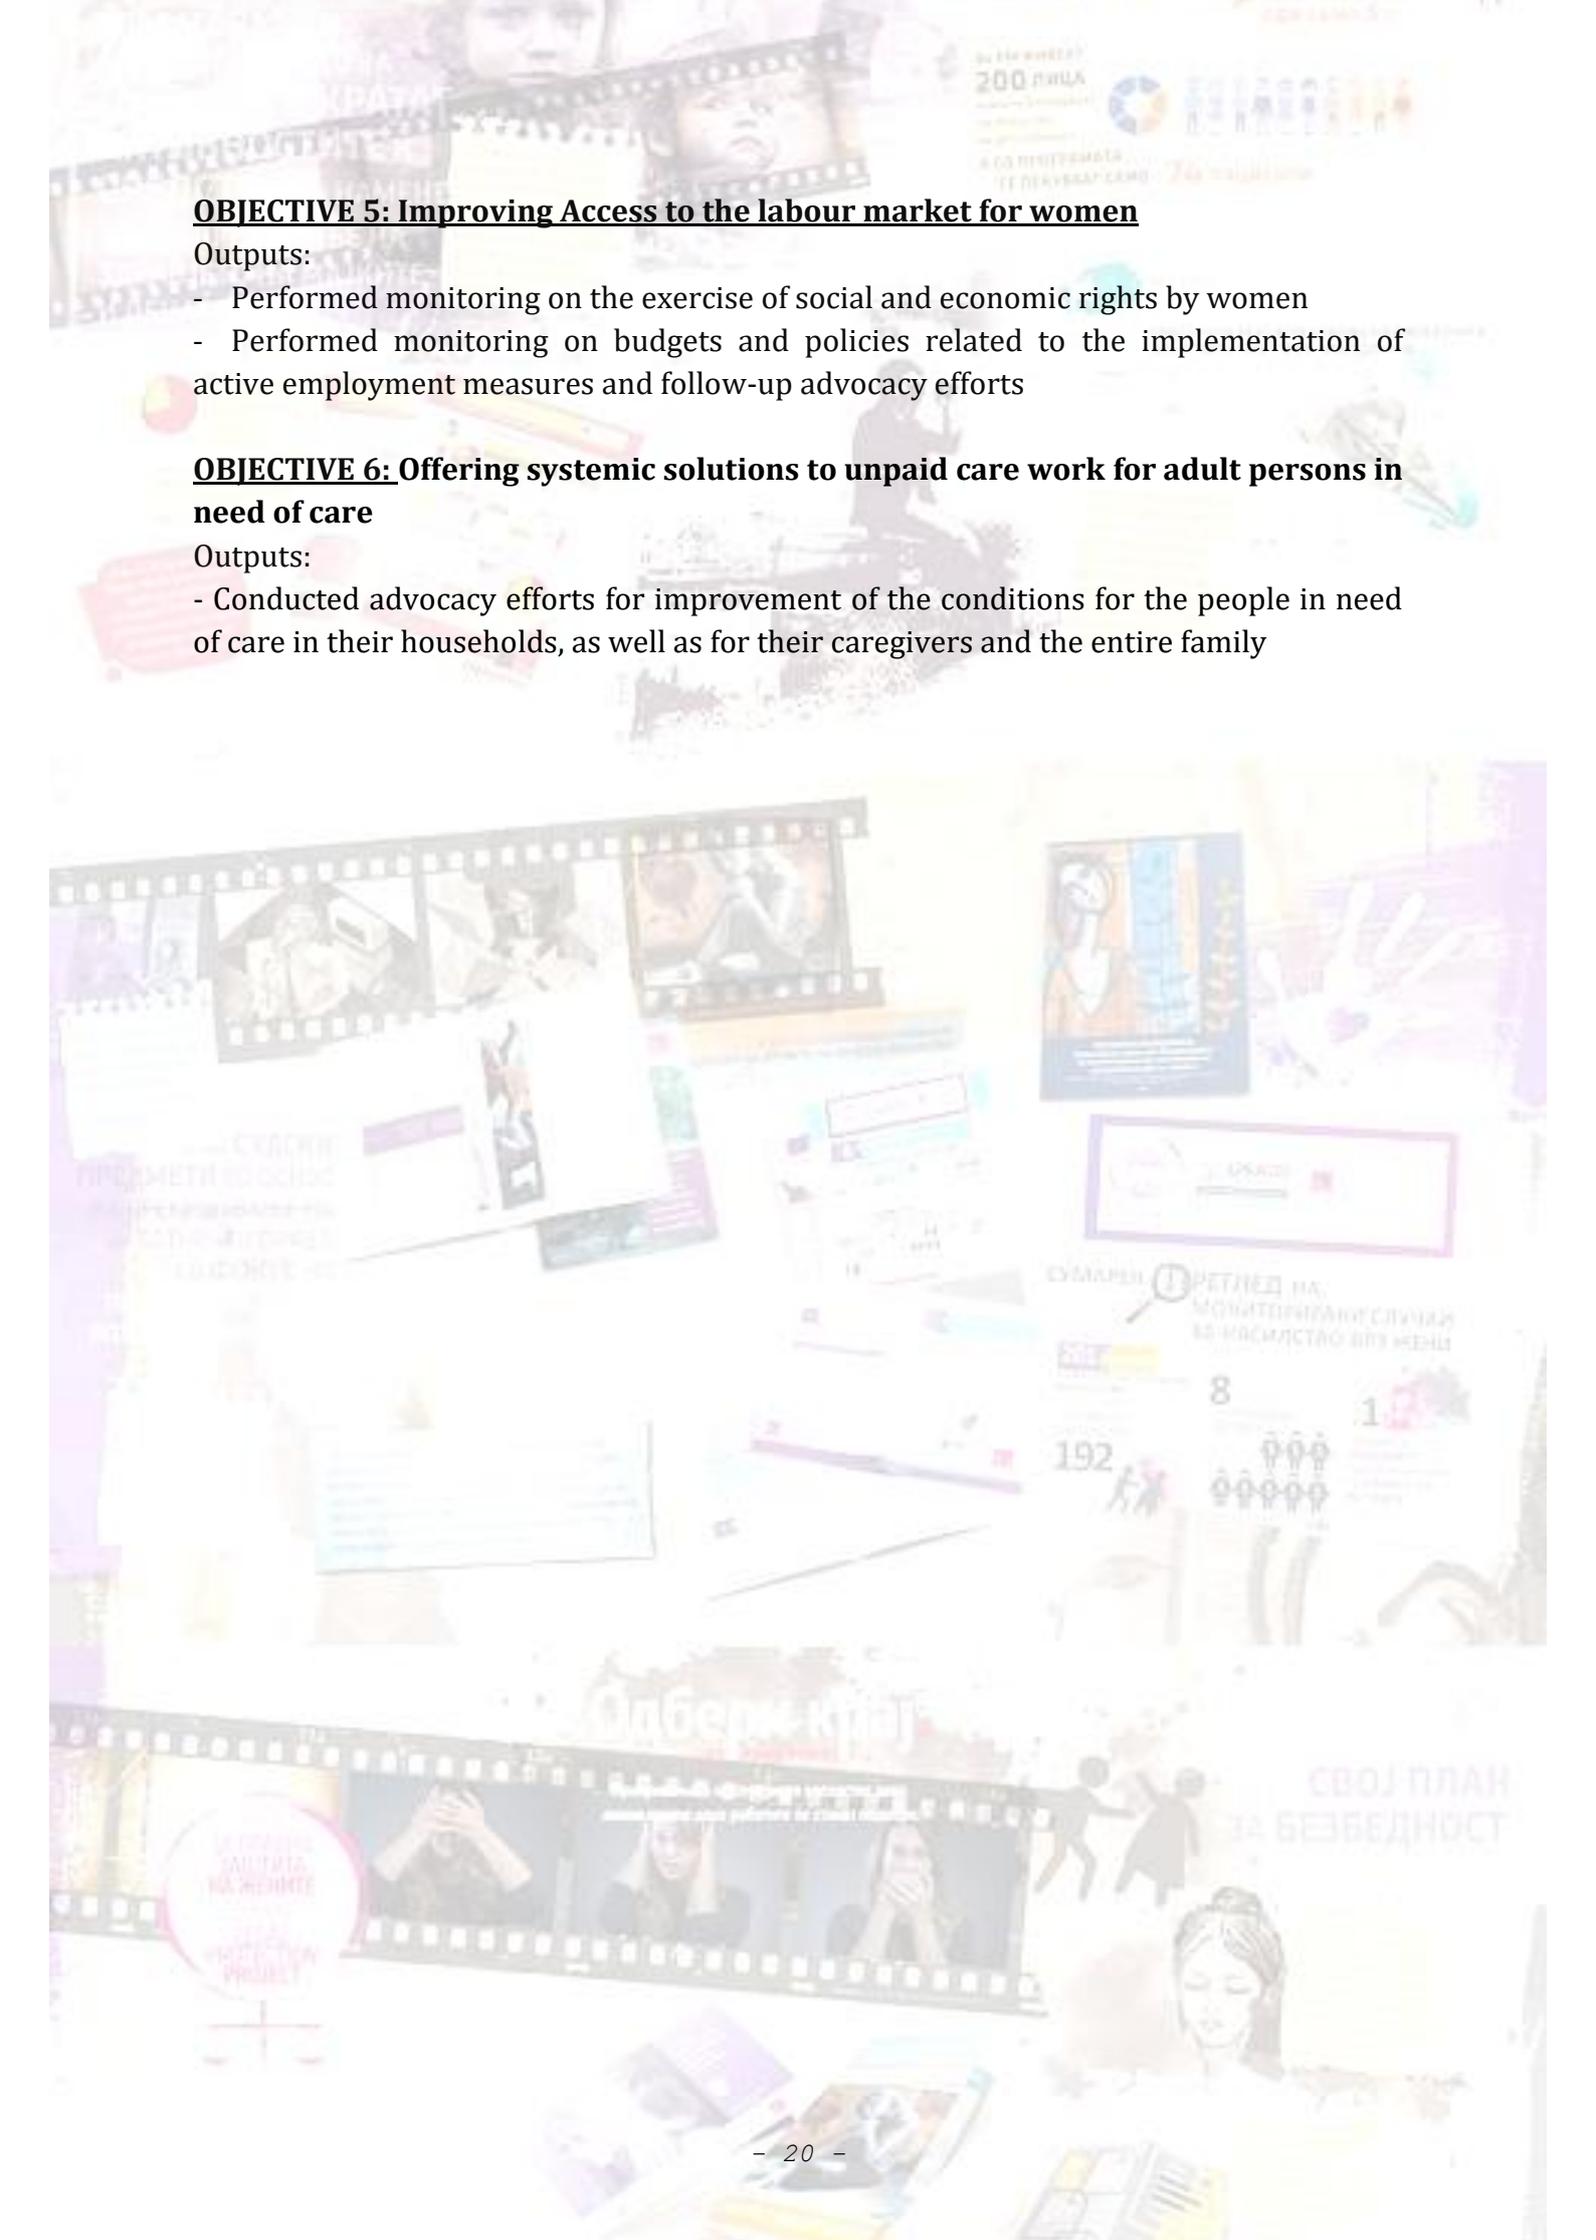

##### Outputs:

- Performed monitoring on the exercise of social and economic rights
- Conducted advocacy efforts on the issue of decreasing perinatal and infant mortality and continuous monitoring of the situation in this regard
- Performed monitoring on the preventive health services for women reproductive health and follow-up advocacy efforts
- Health information provided by the Health info center

#### **OBJECTIVE 4: Improving the health status and access to health services for Roma people, including both women and men**

##### Outputs:

- Performed monitoring on the exercise of social and economic rights by Roma people
- Performed monitoring and analysis of reasons that influence indicators on infant, perinatal and maternal mortality among Roma people and follow-up advocacy efforts
- Performed monitoring of the preventive health services for Roma women reproductive health and follow-up advocacy efforts
- Documented and promoted findings on the effects of interventions implemented in Roma communities

**OBJECTIVE 5: Improving Access to the labour market for women**

Outputs:

- Performed monitoring on the exercise of social and economic rights by women
- Performed monitoring on budgets and policies related to the implementation of active employment measures and follow-up advocacy efforts

**OBJECTIVE 6: Offering systemic solutions to unpaid care work for adult persons in need of care**

Outputs:

- Conducted advocacy efforts for improvement of the conditions for the people in need of care in their households, as well as for their caregivers and the entire family

## PLAN OF ACTIVITIES, TIMEFRAME AND FINANCIAL PLAN

<b>Strategic objective A.1.1.: Strengthening and promoting engagement of citizens in the processes on planning, implementation and evaluation of legal regulations, budgets and services, as part of the social accountability and legal empowerment approach</b>				
<b>Outputs</b>	<b>Activities</b>	<b>Timeline</b>	<b>Implementing entity</b>	<b>Necessary resources (in EUR)</b>

## **PRIORITY 2:**

### **TO ENSURE EQUAL ACCESS TO JUSTICE IN THE FIELD OF SOCIAL AND ECONOMIC RIGHTS**

#### **OBJECTIVE 1: Strengthening capacities of cost-effective alternatives in order to help people resolve unmet justice needs**

##### Output:

- Enhanced knowledge and skills of paralegals that provide paralegal assistance to various vulnerable groups of citizens

#### **OBJECTIVE 2: Collect people-centered justice data and provide evidence to facilitate access to justice**

##### Outputs:

- Determined court cost on all court procedures relevant to the resolution of domestic violence, including child alimony requested and approved by the courts
- Prepared access to justice index for women that suffered domestic violence
- Supported implementation of SDG 16.3 on the national level
- Raised broader public awareness and media inclusion on people-centered justice data promotion

#### **OBJECTIVE 3: Provide access to people-centered justice services for women that suffered domestic violence**

##### Outputs:

- Secured direct support to women who suffered violence
- Provided legal aid and assistance through virtual legal aid Platform
- Enhanced prosecution efforts through urgent prevention of domestic violence and effective police investigation
- Built capacities of young lawyers in monitoring, analyze and solve the legal needs of women who suffered domestic violence
- Assessed level of court protection and improved judicial proceeding through the involvement of a pool of specialized young lawyers

#### **OBJECTIVE 4: Enhancing access to justice and the rule of law by investing in the formal justice institutions that play a frontline role in delivering justice**

##### Outputs:

- Initiated Assessment of gender equality in the judiciary
- Monitored transparency, accountability and effectiveness of the Commission for Protection against Discrimination (CPD)
